

Plasma Physics and Controlled Fusion

**Submission
deadline:**
15 October
2017

iopscience.org/ppcf

Call for papers

Cluster issue featuring papers from the Laser and Plasma Accelerator Workshop 2017, Jeju Island, Republic of Korea, 27 August – 1 September 2017

Your invitation to submit

Plasma Physics and Controlled Fusion™ (PPCF) is delighted to announce that it will be publishing a selection of papers from the 2017 Laser and Plasma Accelerators Workshop (LPAW). All speakers are encouraged to submit to this issue. The issue – to be published in the spring of 2018 – will document the latest advances, and identify promising trends, in experimental and theoretical aspects of plasma-based accelerators and their applications

You are invited to submit your article by **15 October 2017**

PPCF now publishes special issues incrementally. This means that when an article is accepted, it will be published online without waiting for the final paper in the issue. At the same time all articles are gathered together on a dedicated special issue webpage, which will be used to promote the issue. This means that early submissions will not be delayed, maximising the readership and citation opportunity for all articles.

Special issue papers in PPCF can be from 4 to 14 pages (at approximately 900 words per page) in length, including space for figures, graphs and tables (figures are equivalent to about 300 words each). We encourage colour figures and multimedia clips for the online version of the special issue, for which there is no charge. As with our regular submissions there will be no page charges.

All submitted articles must fit within the scope of PPCF and will be fully refereed to the journal's usual high standards. Please read the scope (<http://iopscience.iop.org/journal/0741-3335/page/Scope>) page for more information before submitting. The issue will be widely promoted to the plasma-physics community, ensuring that your work receives maximum visibility.

Guest editors

- Bob Bingham (Rutherford Appleton Laboratory, UK)
- Hyung Taek Kim (IBS&GIST, Rep. of Korea)

How to submit your paper

- Use our submission facility at <https://mc04.manuscriptcentral.com/ppcf-iop>
- E-mail files as attachments to ppcf@iop.org

If submitting online, please select 'Special Issue Article' as the manuscript type, and select 'Special Issue on the 2017 Laser and Plasma Accelerator Workshop' from the drop down box. Please note that the submission deadline is 15 October 2017.

About Plasma Physics and Controlled Fusion

Published every month, PPCF covers all aspects of the physics of hot, highly ionized plasmas. This includes results of current experimental and theoretical research on all aspects of the physics of high-temperature plasmas and of controlled nuclear fusion, including the basic phenomena in highly ionized gases in the laboratory, in the ionosphere and in space, in magnetic-confinement and inertial-confinement fusion, as well as related diagnostic methods.

Further information

For further information, or to request a free sample of the journal, visit www.iopscience.org/ppcf or e-mail the PPCF publishing team at ppcf@iop.org.
